#### Findings & Recommendations:

The submitted plan is generally consistent with the Regional Plan & Regional Resource Plan.

#### There are potential conflicts with neighboring jurisdictions' comprehensive plans.

🛛 Yes 🗌 No

### Findings & Recommendations:

On Walnut Grove's Future Land Use Map, there are areas designated as "Residential" along the city's eastern and southern borders with Walton County's Conservation Character Area. To facilitate the transition from Residential use to the county's lower-intensity Conservation use, Walnut Grove should favor screening, buffers, and lower-density residential development near these borders. In addition, there are three parcels on the west side of Walnut Grove designated as "Agriculture/Forestry" that abut Walton County's Suburban Character Area. Depending on the type of agricultural or forest use on these parcels, Walnut Grove may want to consider screening and buffers along this part of the western border with Walton County.

### **Opportunities for inter-jurisdictional/regional solutions to common issues** *[findings & recommendations]:*

The plan includes as goals and policies to work with other local governments throughout the county to achieve the vision of the plan, to work with the Georgia Department of Transportation (GDOT) on appropriate transportation infrastructure and design, and to work with Walton County to create a large park within the city. Walnut Grove has existing partnerships with Walton County regarding services such as water and parks,

and these partnerships should continue. The City should also coordinate with Walton County when ready to expand broadband access and to address infrastructure maintenance needs. As Walnut Grove is within the Atlanta MPO, the City will need to work with the MPO toward the objectives in the Atlanta Region's *Regional Transportation Plan*. The City should also reference the *Walton County Comprehensive Transportation Plan* for local road evaluations and information about upcoming projects. Walnut Grove should also work with GDOT to redesign State Routes 81 and 139 for slower speeds, non-vehicular transportation options, and/or safety enhancements.

#### Review of internal consistency [findings & recommendations]:

Within the city, there are three locations where "Commercial" future land use borders "Agriculture/Forestry" future land use. Depending on the type of agricultural or forest use in these locations, Walnut Grove may want to consider screening and buffers to soften the transition from high-intensity to low-intensity land uses.
