

Received from the Mayor at 3:50 PM 4-20-2023

Good afternoon Maxine McClanahan,

We do seem to have a dilemma. The law does require that the meeting schedules (meeting dates, not the agenda) be posted on the meeting location, posted on the website, and the paper notified. All three requirements were done in compliance with state law as the city posted all regular meetings for the City Council, Planning and Zoning, and Downtown Development Authority for the year. Somehow, the notice posted on the meeting location door was removed. Since we do not know when the notice was removed, we may not be in strict compliance with state law.

We will let the Planning and Zoning Chairman and our City Attorney make the call as to how to precede at this late date.

Thank you for bringing this to our attention,

Mark Moore
Mayor

Received from
Don Cannon, Chairman, Planning and Zoning Commission at 4:01 PM 4-20-2023

Hello, Folks!

Yes, I will confirm that due to an unintentional error on my part the date of the meeting was not posted properly. Since public hearings are technically separate and a part from our normal meetings I had hopes that we would be able to hear those items and defer the other agenda items to a later date. I went ahead and posted the agenda, and then contacted Tony Powell who confirmed the public hearings would require a 24 hour notice. I advised Mayor Moore of these findings. Therefore, tonight's meeting is being cancelled. I have advised Joe Walter of this situation and requested that he notify the affected parties. Both the Mayor and Staff indicate that in the past a "full years schedule" of our meetings were posted in similar fashion as that of the City Council and Downtown Development Authority, however, no such schedule for the Planning Commission is currently posted.

I will be at the building tonight to meet any who attend, and I regret the inconvenience that will result.

If you any questions, please give me a let me know.

Don Cannon
